

Base Year Modification Request Certification**Part 2: Generation Study - Includes Extrapolation of Residential or Non-Residential Diversion Data**

To request a substitution for a previously approved base year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to reach your OLA representative.

Mail completed documents to:

**California Integrated Waste Management Board
Office of Local Assistance (MS - 25)
1001 I Street
PO Box 4025 (mailing address)
Sacramento, CA 95812-4025**

General Instructions:

Please select the **ONE** choice below that best explains your request to the Board.

1. Use a recent generation-based study to calculate our current reporting year generation amount, but not officially change our existing Board-approved base year.

X 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative by calling (916) 341-6199

Section I: Jurisdiction Information and Certification

All respondents must complete this section.

I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:

Jurisdiction Name City of Davis		County Yolo County	
Authorized Signature 		Title Operations Administrator	
Type/Print Name of Person Signing William "Bill" Hedberg	Date 10/1/01	Phone () Include Area Code (530) 757-5686	
Person Completing This Sheet (please print or type) William "Bill" Hedberg	Title Operations Administrator		
Affiliation: Operations Administrator, Public Works Department			
Mailing Address City of Davis, Public Works Department, 23 Russel Boulevard	City Davis	State CA	ZIP Code 95616
E-Mail Address bhedberg@ci.davis.ca.us

Section II: Information for New Generation-Based Study

Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g., "4").

Note: New base years must be representative of a jurisdiction's disposal and diversion.

1. Current Board-approved existing base year:

1990

2. Proposed new generation-based study year:

2000

3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:

This new generation number reflects the current disposal and the diversion practices in the year 2000. The City has implemented, and maintained numerous diversion practices in the last ten years, and is committed to continued diversion program expansion.

4. Enter diversion rate information below.

Diversion rate calculated using existing base year	a. 49%	Diversion rate calculated using new generation-based study	b. 57%
For existing base year pounds/person/day based on generation	7.2	For new generation based study pounds/person/day based on generation	8.9
Residential generation 40%	Non-Residential generation 60%	Residential generation 27%	Non-Residential generation 73%
Population existing generation-based study 46322		Population new generation-based study 60308	

5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide examples (e.g., change in jurisdiction's demographics).

The new diversion rate more accurately reflects both the amount of waste generated in the City, particularly by businesses, and the concentrated efforts the City has taken to divert this material. The SRRE waste source data for commercial, industrial, & institutional sources, for example, was based on a total of 17 samples (SRRE p. 3-12). This understatement accounts in large part for the lower, less accurate original base-year pounds/person/day figure. 1990 diversion was estimated using data and surveys whose quantity and quality (SRRE p. 3-22) were adequate for the conditions existing then but not for current circumstances. The new base-year data relies on considerably more extensive, in-depth surveys. In addition, the City has implemented, as described in the PARIS section of the Annual Report, several new outreach efforts and diversion programs in addition to the numerous ones selected in 1990. One example is collecting materials for reuse from the thousands of tenants who move out of Davis' multi-family complexes during the lease-turnover/ move-out period at the end of the summer.

6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)

The key reason for the difference in rates is explained in number five—much more accurate data collection. In addition it seems, though we are still analyzing this, that in our case—given our significant number of diversion programs—the default adjustment method does not accurately reflect the changes that have occurred in our community in the last few years. Davis, known for its low-growth attitude and policies and sometimes considered to be less "business-friendly" than other locales, experienced a high rate of residential and, comparatively-speaking, commercial growth in the latter '90s. In addition, remodeling seemed to skyrocket. However, much of the commercial growth seems to have been in businesses that do not generate sales tax, a key factor in the adjustment method. Thus, we believe the new study much more clearly states the true picture of generation, disposal, and diversion activities and provides us with a better understanding of how to plan and implement our future diversion efforts.

7. Disposal Tonnage (enter values):	10200	31362	41562
	Residential	Non-Residential	Total

Please select the **ONE** choice below that best explains your **disposal** data and complete the required tables.

a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)

b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Modification Request and

c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at www.ciwmb.ca.gov/LG)

8. In the table below, list the summarized diversion activities and diversion data records that support your claim and are available for Board audit. (Note: the Board expects the

* Please provide detailed non-residential waste audit information in Section 9.

Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details.

Diversion Activity	Actual Tons (A)	Estimated or Extrapolated Tons (B)	Total Tons (A+B)	Relative Percent to Total Generation (A+B)/Total Generation	Specific Material Type(s) (List programs with multiple materials together)	Specific Conversion Factor Used (if any) and Source	Type of Record and Location of Record

9. Specific Non-Residential Sector Waste Audits – Top 10 Non-Residential Generators

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from the largest to smallest, based

Include attachment, marked attachment 9, which includes a summary of all the generators surveyed and all extrapolation calculations used to estimate the diversion rate:

- Include copies of survey form(s) used.
- Include for each generator (use type of generator in lieu of specific generator name, e.g. grocery store) each specific diversion activity and material type
- If using number of employees for your extrapolation method, include this information for each generator surveyed.
- Please order the non-residential generators, largest to smallest, based on total diversion tons.
- Also, summary should include the generators that were selected to be surveyed, but did not respond to the survey and the number of employees at each
- As a comparison between disposal from the waste audits and DRS, the disposal for each generator must be included in the summary. Also, you should note

Type of Non-residential Generator	Audit Reference Number	Specific Diversion Activities include material type (e.g. paper recycling, grasscycling). (List activities on one line)	Number of Employees	Source Reduction Tons	Recycling Tons	Composting Tons	Total Diversion Tons	Percent of Total Generation (Total Diversion Tons/Total Generation in Section 8)	Survey Method Phone (P) Mail (M) On-site (O) Other _____
Grocery store	141	OCC recycling, 5 gal. Bucket reuse/donation, wooden boxes returned, bakery/produce composted, meat rendering, grease rendering, grey toter replaced OCC, pallets exchanged, bake goods donated, broken metal carts repaired.	56.0	143	383	155	681		O
Grocery store	136	OCC recycling, mp/food waste composting program, displacement-totes	25.0	1	244	73	318		O
Retail-drugstore	104	OCC recycling, shredded paper recycling, defective products returned to dist., keebler returns, new printer/registers eliminated details tape	54.4	38	156	0	194		O

Grocery Store and Full Deli	120	occ recycling, grease recycling, toner/printer cartridge recycling, double siding, displacement: use of totes, reuse of kraft bags, mags&cards exchanged to vendor vs tossing, shared mags subscriptions, exchange: plastic pallet use, scavenged pallets, perishables exchanged	97.5	12	192	0	203	0
Grocery store	151	Duplex, scratch paper, OCC recycling, tonner cartridge recycling, reuse plastic buckets, grease rendering, meat rendering, produce composted, file purge paper recycling, pallets exchanged	30.0	33	146	18	197	0
Grocery/bakery	52	change from OCC to plastic totes, food donation, changed from waxed OCC to recyclable, equipment repaired	52.0	20	163	0	183	0
Retail tire center	78	occ recycling, tire recycling, donations to Davis	10.0	120	1	0	121	0
Grocery Store and Full Deli	119	occ/wl/mp bailed & recycled, grease recycling, displacement: use of totes, reuse of mayo jars	45.0	3	90	0	93	0
Construction Company	184	occ recycling, paper recycling, scrap paper recycling, toner cartridges, wood recycling	24.0	0	87	0	87	0
Retail tire center	24	paper recycle, OCC box recycle, brake recycling, plastic quart recycling, rim reuse, toner cartridges, reuse tire bags, lead recycling, tire reuse	10.5	84	2	0	86	0
Totals			404	454	1,462	247	2,153	

Section 9: Summarize the non-residential diversion activities for the top 10 generators quantification methodology and applicable conversion factors and sources.

Generator Type	Audit #	Program	Calculation
Grocery Store	141	OCC recycling	3 bales/day X 600 lbs/bale X 365 day/yr
		5gal.buckets reused/donated	10 buckets/wk X 1.9 lbs/bucket X 52 wk/yr
		wooden boxes returned	.5 lbs/box X 250 boxes/wk X 52 wk/yr X 70% (go back)
		bakery/produce composted	700 - 1000 lbs/day = 850 lbs/day X 365 day/yr
		meat rendering	5 containers/wk @ 45 gal/cont X 52 week X 7 lbs/gal
		grease rendering	200 lbs/wk X 52 wk/yr
		grey toters replaced OCC	100 toters/wk X 1.1 lbs/box (OCC displaced) X 52 wk/yr
		pallets exchanged	50 pallets/day X 365 day/yr X 40 lbs/pallet + 5 (times used then breaks)
		bake goods donated	100 lbs/day X 365 days/yr
		broken metal carts repaired	15-20 every 3 months = 17.5/3 months X 12 months X 30 lbs each
Grocery Store	136	occ recycling	12.5 bails/wk X 52 wk/yr X 750 lbs/bail
		mp/food waste composting program	4.5 blocks/wk X 52 wk/yr X 625 lbs/block
		displacement - totes	12.5 ea/wk X 52 wk/yr X 2.2 lbs/med box
Hardware Store	104	OCC recycling	8-9 bales avg = 8.5 bales/wk X 700 lbs/bale X 52 wk/yr
		shredded paper recycling	9 gal X 2x/wk X 8 lbs per 33 gal X 52 wks/yr
		defective products returned to dist.	10 totes/wk X 25 lbs/tote X 52 wk/yr
		keebler returns	20-25 lbs/mo = 22.5 lbs/mo X 12 mo/yr
		new printers/registers eliminate detail tape	saves 20 case/yr X 30 lbs/case
		boxes displaced by plastic	20% changed to plastic so 20% of OCC = 20% of 309,400 lbs/yr
		donated computers	3-4/yr = 3.5 cpu + monitor/yr X 56 lbs/set
		donatons to STAKE	20 lbs/mo X 12 mo/yr
Grocery Store and Full Deli	120	occ recycling	7000 lbs/wk X 52 wk/yr
		grease recycling	1 cy/mo X 12mo/yr X 1595 lbs/cy
		toner/printer cartridge recycling	10.5 ea/yr X 2.5 lbs/ea
		double siding	1 case/mo X 12 mo/yr X 50 lbs/case
		displacement: use of totes	40 ea/wk X 52 wk/yr X 2.2 lbs/med box
		reuse of kraft bags	100 ea/wk X 52 wk/yr X 0.15 lbs/ea
		mags&cards exchanged to vendor vs tossing	50 lbs/wk X 52 wk/yr
		shared mags subscriptions	4 ea/mo X 6 emp (sharing) X 12 mo/yr X 0.3 lbs/ea
		exchange: plastic pallet use	20 ea/wk X 52 wk/yr X 8 lbs/ea
		scavenged pallets	2 ea/wk X 52 wk/yr X 40 lbs/ea
		perishables exchanged	40 lbs/wk X 52wk/yr

(e.g. cardboard recycling: quantified by monthly tonnage receipts provided by the contact person at the business)

10. On a separate sheet of paper, marked attachment 10, provide the following information for each diversion program listed in section 8 that was extrapolated from representative sampling. (Note: Do not include non-respondents in extrapolation because there is no data from the non-respondents. Extrapolate from survey respondents.)

A. Describe sampling method including:

- Type of sampling method (for either stratified or cluster sampling provide detailed information on how strata and clusters were collected.);
- Total number of samples included in the survey;
- Number of non-respondents and respondents;
- Total population;
- Source for identifying population (e.g. city business licenses, commercial database, resident's addresses, etc.);
- Relation of sample size to total population;
- Survey data collection tool(s) and approaches;
- Confidence level and margin of error for the sampled population;
- Outliers (specific generators which fall significantly above or below others) should be removed from base amount prior to extrapolation; and
- Unusual outliers and exceptional anomalies should be described in detail.

B. Describe the methods used to prevent double-counting between the surveys and the reported tonnages from haulers, recyclers, MRFs and composters.

C. Describe extrapolation method including:

- Basis of extrapolation;
- Why this extrapolation method is appropriate; and
- Sources of information used for extrapolation, such as disposal or employment.
- Include all Calculations.

Please note attachment: Davis B.Y. Report 2000 - Attachments.doc

11. For each restricted waste type [(i.e. agricultural waste, inert solids (e.g. concrete, asphalt, dirt, etc.), scrap metals and white goods (PRC Section 41781.2)] and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table:

(Note: program name refers to one specific diversion program for that waste type, for example diversion conducted by City Public Waste Dept.)

Restricted Waste Type	Specific Program name	Year started	Tonnage
Inert Solids	City Project - Asphalt Concrete grinding reuse	1995	645
Inert Solids	Central Landfill Inerts Facility - Inert processing for reuse	1998	6,400
Scrap Metals	Central Landfill Metals Facility - scrap metal processing for recycling	1995	61
Scrap Metals	Commercial Audits - Non Extrapolated Restricted Metals (scrap metals)	1991	23
White Goods	Central Landfill Metals Facility - white goods/appliance recycling	1995	270

b. If the diversion program started before January 1, 1990, on a separate sheet, marked attachment 11b, provide the following documentation: (Note: If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 11b for that waste type and program. Instead please provide date of Board approval of previous submitted information.) _____ (Date)

If documentation is not available, go to 11d.

▪ How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion [PRC Sec. 41781.2 (c) (1)].

▪ That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (Note: this criterion is applicable to the entire jurisdiction, not to individual programs [PRC Sec. 41781.2 (c) (2)]). Please include documentation.

▪ The jurisdiction is implementing, and will continue to implement, the diversion programs in its Source Reduction and Recycling Element.

c. If the diversion program started before January 1, 1990, and the documentation requested in 11b is available (but not yet approved by the Board), complete the table below for each program claimed:

Restricted Waste Type	Specific Program Name	New base year or reporting year diversion tonnage

d. If the diversion program started before January 1, 1990, and the documentation requested in 11b is not available, please complete the table below for each program claimed. (Note: Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.)

Restricted Waste Type	Specific Program name	New base year or reporting year tonnage	1990 diversion tonnage	Difference
